

Premier English Manufacturing Ltd

PrEMco

Our aim is to turn your concept in to a reality but to do this professionally it takes time. (6 to 12 months)

In our initial discussions, your concept will be examined to ascertain whether or not it is feasible for this to become a reality.

Once agreement has been reached an Indicative Quotation will be sent out;

We charge £250.00 per day, for development of the formulation for your product(s). This will include samples of the developed formulation sent to you for approval

The requirement of any further samples (with or without packaging) will be charged at £250.00 per day. This may be subject to a prior agreed cost.

Ingredients will be sourced by us or free issued by yourselves

Safety assessments charges are £275.00 + VAT per product/ variant. These are required by EU Regulation 1223/2009

Cosmetic Production Notification Portal charges are £50.00 +VAT per product/variant. These are required by EU Regulation 1223/2009

Challenge testing (liquids only) are £156.00 + VAT per product/ variant. These are required by EU Regulation 1223/2009

Should any other testing be required, costs will be agreed prior to the undertaking of said tests.

Our minimum order is normally 5000 soap bars and 500Kgs for liquid. Each order will be for one fragrance only

Once agreement has been reached and you are happy with your product, it will then go on to stability testing. This will also include packaging. This will take 3 months after all ingredients and packaging have been sourced.

After testing has been completed and approved, placing an order will be discussed and a Final Quotation issued.

After receiving a P.O. for your first order, all ingredients and packaging will be ordered for the manufacture of your product.

Once we have received all the required items for the complete manufacture of your product, we will advise you of our earliest delivery date.

Please note that should you decide not to go ahead with your product after formulation has been agreed. The company (PrEMco) retain the rights to your formulation.
